TOS-1611-57
Copy 2 of 3

11 JUL 1957

MEMORANDUM FOR: Project Director
THROUGH: Deputy Director/Intelligence
SUBJECT: Request for Clearances

1. As a result of our discussions, O/SI is planning to initiate at high priority a study of possible Soviet developments in a key field. This study will require AQUATONE, TALENT and RAINBOW clearances for the participants. It is our intention to assign three people to this work. 25X1A9a

2. The group leader, [REDACTED] has had both "A" and "T" clearances as an occupant of an ESO slot for the Project. Due to special overseas operational requirements, [REDACTED] was debriefed in January 1957. He will be rebriefed and will reoccupy his ESO slot for Project AQUATONE immediately on his return to duty at Barton Hall. 25X1A9a

3. [REDACTED] will be assisted on this special study by [REDACTED], who has now only a "T" clearance, and [REDACTED] who has at present no project clearances. In order that we may move immediately in this matter, it is requested that an "A" clearance be granted to [REDACTED] and both "A" and "T" clearances be given to [REDACTED]. A position description for [REDACTED] Project HT AUTOMAT slot in the required format is attached to this correspondence. 25X1A9a

4. In addition, it is requested that RAINBOW clearances be granted to all three individuals.

25X1A9a [REDACTED]

HERBERT SCOVILLE, JR.
Assistant Director
Scientific Intelligence
